SUMMARY

Experienced Fullstack Developer skilled in building scalable, responsive, and high-performance web and mobile applications. Backend experience includes Python (Django/FastAPI/Flask), Node.js, NestJS, and RESTful API engineering, alongside frontend expertise with React.js, Next.js, Vue.js, and TypeScript. Strong background in microfrontend architecture, performance optimization, and cross-department collaboration to deliver robust end-to-end software solutions.

SKILLS

Backend & Database	Node.js, NestJS, Python (FastAPI / Django / Flask), RESTful APIs, PostgreSQL / MySQL, MongoDB, ORMs (SQLAlchemy / Django ORM)
Frontend Development	React.js, Next.js, Vue.js, TypeScript, JavaScript, Redux, HTML5/CSS3, Responsive Web Design
Mobile Development	React Native
Tools & Methodologies	Git/GitHub, Docker, CI/CD, Microfrontend Architecture, System Debugging, Code Review, Agile/Scrum

WORK EXPERIENCE

Alternative Media Group
Jun 2026 – Present

Fullstack Developer (CMS & Media Operations) — Jakarta, Indonesia

- Developed fullstack campaign management tools and operational dashboards in Python and React/TypeScript to manage content, targeting, reporting, and fleet operations across a vehicle media platform.
- Built campaign, playlist, and targeting CMS interfaces integrated with Python backend APIs to streamline media operations.
- Developed dashboard and reporting modules to improve real-time visibility into operational performance.
- Implemented scalable frontend architecture and design systems to ensure long-term maintainability and system efficiency.
- Defined CMS UX flows, wireframes, and user journeys to align platform capabilities with operational user needs.
- Collaborated closely with backend engineers and stakeholders to refine, secure, and optimize operational workflows.

Frame.io
Sep 2025 – Apr 2026

Fullstack Developer (Node.js & Frontend)

- Engineered end-to-end web applications using Node.js and NestJS RESTful APIs on the backend and React.js/TypeScript on the frontend.
- Designed and implemented backend services with NestJS to support reliable data flow across platform components.
- Conducted code reviews and system debugging to maintain software quality and clean code standards.
- Developed reusable UI components to enhance platform performance and maintainability.

PT. Barito Integra Teknologi
Jun 2024 – Aug 2025

Fullstack Developer

- Contributed to the Prudential Team by delivering integrated web and mobile applications powered by Node.js and NestJS backend services.
- Implemented microfrontend architecture and optimized backend API consumption to improve insurance agent workflows and system efficiency.
- Built reusable interface components, including Date Picker and File Upload, integrated with backend file-handling services.
- Led code reviews and collaborated across teams to foster an engineering culture of quality and performance.

WORK EXPERIENCE — CONTINUED

PT JAGAD AMAN PRIMA **Aug 2023 – Jun 2024**

Fullstack / Web Developer

- Built a comprehensive CCTV management dashboard for Pertamina, integrating real-time backend data streaming and monitoring tools.
- Developed a real-time parking monitoring system for DSN, optimizing backend data processing for rapid accessibility.
- Used Node.js and NestJS for backend services, alongside React.js, Vue.js, Next.js, React Native, and TypeScript for application delivery.

Itsavirus **Aug 2021 – Aug 2023**

Software Engineer / Frontend Developer

- Developed core features for the Melalie Mobile App and the main company website.
- Integrated RESTful APIs with mobile and web interfaces using TypeScript and React Native.
- Collaborated in an agile startup environment to deliver creative and innovative software solutions.

EDUCATION

Glints Academy X Binar Academy — Fullstack / Frontend Web Development (Mar 2021 – Jun 2021)

SMA Negeri 2 Pandeglang — Natural Science (Jan 2014 – Jan 2017)

CERTIFICATIONS

Certificate of Completion — Glints Academy (Jun 2021)
